AUTOMATIC RECORD SELECTION AT THE TOUCH OF A BUTTON

Finding the right record is as easy as pushing a button with the Diebold Super Elevator File. When depressed, latch-type button automatically holds contact until desired record pan reaches the correct working position.

FULL PROTECTION ALL THE TIME

Full width "Guard Panel" immediately in front of records protects operator should file be accidentally activated while records are being checked. The slightest pressure on this panel stops machine instantly.

File can also be stopped in motion by pressing "stop" button.

CIRCUIT BREAKER SWITCH

Signal light at left of circuit-breaker switch is lighted to indicate power is "on." In event of an overload condition, switch will snap to "off" position, instantly cutting off current to motor.

CONTINUOUS CONTROL

For standing reference, the Diebold Super Elevator File can be operated manually by switching the file from automatic to continuous control. File trays can be brought to working level desired and held in that position as long as needed.

ALL RECORDS EASILY ACCESSIBLE

No stretching, no straining! Diebold Super Elevator File puts all records within easy reach. Short trays offer complete accessibility, with every record at operator's fingertips.

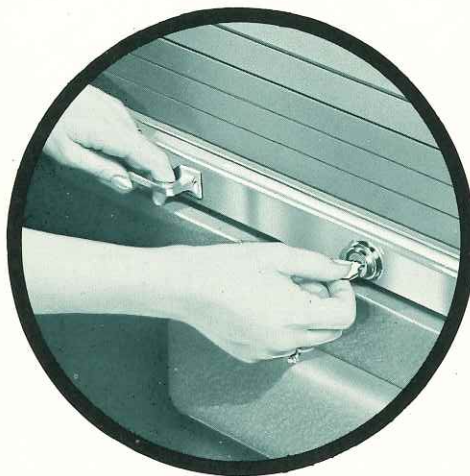

FULL WIDTH SHELF

Each record pan is brought to the operator by touching a button... no stooping or stretching. A full width shelf provides plenty of working area. Fully recessed hood exposes all records to maximum light.

KEY LOCKED HOOD

Roll-top hood has key lock to prevent unauthorized access to records. Keeps records dust-free, too. Dual booster spring assists in opening and closing hood. Only minimum effort required.

Full width work shelf folds up when not in use. Key-locked, roomy compartment is provided for operator's personal effects.

DIRECT RECORD DELIVERY TO OPERATE IN SEATED POSITION

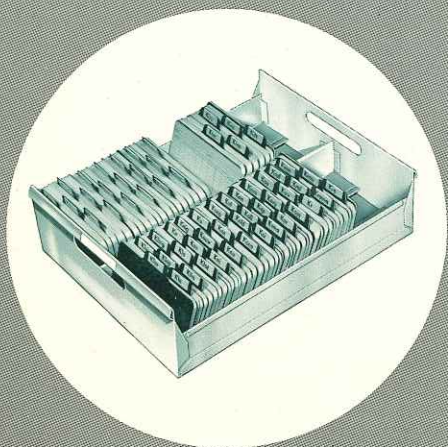

New slanting silhouette allows plenty of extra knee room for operator... adds to efficiency by providing the benefits of working from a comfortably seated position with all records delivered to the operator.

FLEXIBILITY OF RECORD SIZES

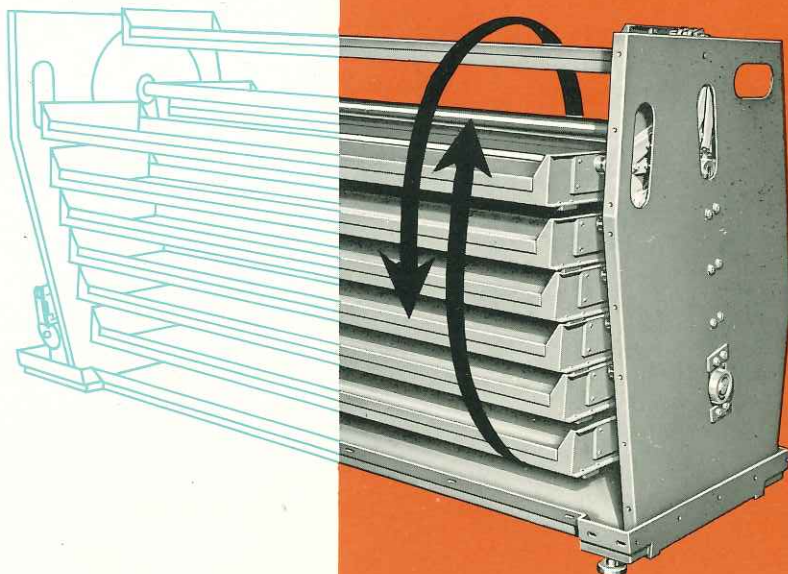

The Diebold Super Elevator File can accommodate a wide range of standard record sizes... even including addressing plates and tab cards filed vertically or horizontally.

Records of different sizes can be housed in the same file and without costly transcription.

Light-weight trays lift out easily... no gadgets to operate.

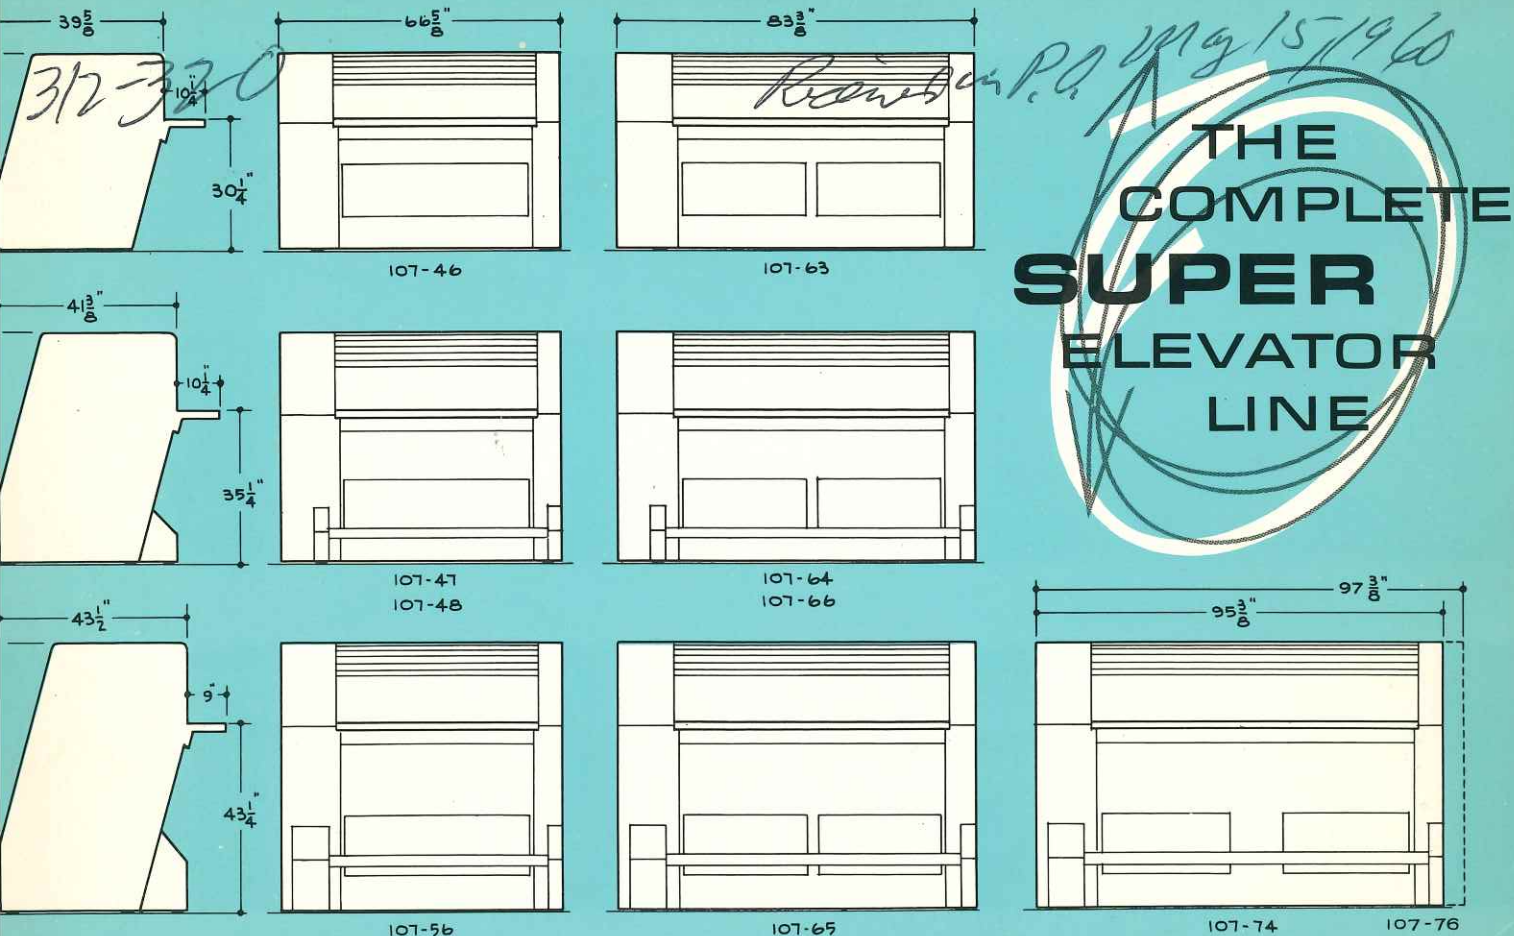

PRIORITY PILOT DICTATES DIRECTION OF ROTATION

WHISPERS WHILE IT WORKS

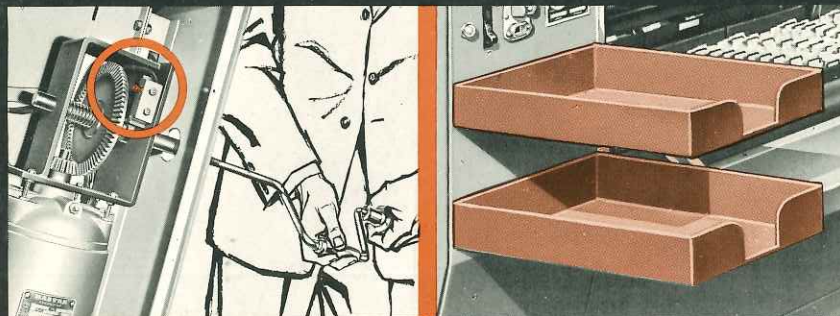

There's no waiting for the Super Elevator File to go through a full cycle to get the records you want... just press the appropriate button and the right record tray will be brought to working level by the quickest, most direct route... automatically.

The Diebold Super Elevator File is as quiet as it is quick. Only a demonstration will prove how really quiet Super Elevator File operates.

EMERGENCY HAND OPERATION

In event of external power failure, a crank arrangement makes it easy to operate the file by hand. The front location eliminates any access problems. A safety device prevents current from activating the motor while the hand crank is in use.

IN AND OUT TRAYS

Ideal for filing incoming and outgoing records. In addition, the Super Elevator File can easily be equipped with telephone facilities, making contents of the file available on call to any department.

DUAL CONTROLS

Optional extra, many models of the Super Elevator File line are available with Dual Push Button Selectors. Duplicate controls are located on each side of the posting shelf.

POSTURE CHAIRS

Diebold Posture Chairs are the natural companion to your Super Elevator File. Finished in contemporary black and white taurus fabric, the chairs are styled to harmonize with the design of the file. The back rest is adjustable for natural support.
